Susan,

Currently plans are being made to remove the remaining scrap pile that's located on the private property just east of the West Fertilizer facility. TCEQ expects for the removal action to take place sometime this week. TCEQ will issue a letter to the responsible party requesting a site plan to address any soil, surface water, and groundwater contamination on and off site. At this time TCEQ has not requested any further assistance from EPA. No other site issues were reported by TCEQ. TCEQ will continue providing oversight and direction of the responsible party's removal and remedial actions. No EPA actions are planned at this time. EPA will follow up with TCEQ as needed.
